 gulation at 4.6% for the upcoming fi-
 scal year against the projected 6.4% for FY21 on
 account of a favourable base effect that wo-
 uld moderate food inflation at 4.7%.

Plastics

blem. But India Inc appreciates that EPR and its effective implementation are critical to growth," says Shantanu Srivastava, Lead, Public Affairs, Thinkthrough Consulting. "The two critical stakeholders for a cleaner environment - the government and India Inc. - need to have a positive approach towards each other to understand their respective efforts better."

What's a simple solution to plastic pile-up? Well, stop manufacturing new plastic. The Plastic Atlas of 2019 by the Heinrich Boll Foundation points out that 9.2 billion tonnes of plastic were produced between 1950 and 2017, which is more than one tonne for each person now living on Earth. More tellingly, less than 10 per cent of all plastic ever produced has been recycled. "Why spend money on the flow when you have the stock?" asks Baid of Vinayak Polycen.

While India Inc adopts the three Rs of reduce, re-use and recycle for plastic, experts believe that India's proposed EPR Framework could provide the national framework for all stakeholders towards PWM. "The current challenge related to compliance across multiple statutory bodies and the non-uniformity of compliance requirements across states needs to be addressed," says Santhosh Jayaram, Partner & Head, Sustainability and CSR advisory at KPMG India. "The Act will also need to address the traceability and transparency in the system."

Atul Sud of WE CARE believes that every stakeholder in the plastic value-chain has a responsibility towards PWM but the most important is individual awareness. And there is hope, says Anantshree of Flex Films: "The younger generation is ready to pay a premium for sustainability as responsible consumption and climate change is a large part of their identity."

(This story is part of a series of articles on sustainability in association with Mondelez India. The company had no editorial input)

systems in place here.

"In energy efficiency, we are showing

in all these, and we are going to make those improvements," he said.

Coal Exchange to Start This Yr

Sarita.Singh@timesgroup.com

New Delhi: The government proposes to start a coal exchange later this year to trade coal mined from private commercial mines along with Coal India's spot auctions.

A senior official said the move is aimed at setting up a mature coal trading market by the time the commercial coal mines become operational.

"In about 5-7 years, 40% of the coal is expected to be produced by companies other than Coal India (CIL). It is our duty to offer a transparent platform for discovery of prices and selection of buyers. Later, power sector can also migrate to it," the official said.

The coal ministry has issued tenders seeking consultancy service in setting up the coal exchange.

ET was the first to report on June 8, 2020 that India has decided to set up a coal trading platform as a giant leap towards completely throwing open the sector to market forces, ending the monopoly of state-run Coal India.

The move is aimed at setting up a mature coal trading market by the time the commercial coal mines become operational.

The official said the gas trading exchange was set up only last year while the first major commercial gas supply from non-government sources started in 2009. "KG basin gas started in April 2009 and they set up a gas trading platform only last year. The coal ministry has come out with commercial mining in 2020, and later in 2021 proposes to have a coal trading platform," he said.

He said exchange trade takes 3-4 years to mature. "By the time commercially mined coal comes, India will have a vibrant coal market."

The government proposes to trade some of Coal India spot auctions on the exchange for volumes, he said. "Coal India sells 20%-25% of its coal through auction mechanism that can migrate to the trading platform and help it achieve some volume."

GOVERNMENT OF UTTARAKHAND
